

# PROJECT UTKARSH

## STATEMENT OF PURPOSE

Name: Subrato Tapaswi

Class: D6AD

Roll No.:60

Email: 2020.subrato.tapaswi@ves.ac.in

1. Elaborate on your knowledge of web development.
  - I have basic to intermediate knowledge of HTML and CSS, still in the beginner phase of learning about web development. I have recently started learning Javascript too
2. How comfortable are you with Python?
  - Intermediate knowledge of Python. The concept of OOPS is similar to that of Java, and so I am familiar with it. Python was introduced to us in this semester itself and therefore, there are still many more things to explore in it.
3. Are you committed to working with this project until its completion?
  - Yes, I am fully committed towards working on this project until its completion. I would like to highlight that irrespective of if I get this opportunity or not, I will focus on learning the necessary skill sets like JavaScript, Git, etc. to improve my technical abilities. If I do get an opportunity, then that will be an added incentive.
4. Tell us about your technical skills in general.
  - A good grasp on C and Java programming languages.
  - I have done a certified course of NVIDIA Deep Learning (Foundational) Course and also some courses of Google Cloud.
  - Basic to intermediate knowledge of Python, HTML and CSS.
  - Still getting started with Javascript, Github, etc.
5. What are your biggest strengths?
  - Perseverance, Hard Working- If I set my mind to something, I will be able to do it.
  - Good communication skills, creative writing and good vocabulary.
  - Good oratory skills and experience of organising events.
  - I have held some positions of responsibilities which have helped me enhance my managing, communication skills and also built my patience.
  - Ability to work in a collaborative environment and a willingness to learn from others.
6. What are your weaknesses?
  - Sometimes, I think I may be too straightforward and critical to friends.
  - I get too fixated on a particular task, and prioritise completing it over other things.
  - I believe I need to improve my critical thinking and technical skills.
